PROJECTS

SEAT BOOKING APP : ReactJS, JavaScript, NodeJS , Netlify [View Code](#)

The project is a generalized platform focused on creating and managing real time seatbooking in the office , where an employee can choose to book his/her seat in advance by checking the availability. The aim was to make the hybrid work model more friendly to the employees . The front end of the application is developed with React and backend with node.js

Deployed link <https://seatbookinghours.netlify.app/>

PERSONAL PORTFOLIO: ReactJS, CSS, JavaScript. [View Code](#)

It's a Completely responsive Portfolio website build with ReactJS and no other Library or Framework is used
It is scalable and Attractive. It's also easy to update
